- Main and jib halyard led to cockpit

Top of the trailerable Com-Pac line, the Com-Pac 23 offers accommodations and equipment which make her a most exceptional yacht. With a two cabin layout for privacy, a standard equipment hide-A-way galley and shoal draft keel developed from NASA low-drag, high lift wing sections, the Com-Pac 23 is ready for extended cruising and gunkholing.

Below, you will find loads of storage space, berths for four adults, teak and holly cabin sole, six bronze opening ports and extensive hand finished teak wood trim. Topside, the large foredeck and wide sidedecks make moving around and handling sails a pleasure. The large 7'2" self-bailing cockpit has a gas tank storage compartment plus port and starboard seat lockers.

The hull and deck are fabricated of hand laid fiberglass with the hull having longitudinal and transverse stringers integrated into it for stiffness. The deck has core material over 100% of its surface for rigidity and insulation.

With her 27" draft and 8' beam, the Com-Pac 23 is even trailerable. When she is coupled with the custom designed, tandem

axle trailer, the Com-Pac 23 is truly the "go anywhere yacht."

When sailing, the Com-Pac 23 is in her element. The masthead sail plan, supported by the eight stay, stainless steel, standing rig, powers her smoothly and efficiently
